

Weill Cornell Hosts Professional Development Workshop for High School Teachers

New York City high school teachers gave up their weekends to participate in a professional development workshop held at Weill Cornell on January 17th and 18th. The workshop was organized by the Outreach Office of Weill Cornell Graduate School of Medical Sciences (WCGSMS), directed by Dr. Brian Turner, '02.

During the event, high school teachers attended four lectures and conducted three hands-on labs designed to update their knowledge of state-of-the-art techniques and recent findings in biomedical science. Along with Dr. Turner, three graduate student volunteers, Michael Bruno, Deirdre McGarrigle, and Jeremy Seto as well as WCGSMS alumna Dr. Sara Glickstein, assistant professor of clinical psychiatry at Columbia University, helped orchestrate the event.

Lectures included "The Pros and Cons of Genetically Modified Organisms," presented by Mr. Bruno; "New Technology in Biomedical Science," given by Mr. Seto; and "Molecular Evolution and Biomedical Science," taught by Dr. Turner. In addition, Dr. Glickstein introduced the teachers to Problem-Based Learning (PBL), with a PBL session on Huntington's Disease.

The three hands-on labs included a bacterial transformation experiment (presented by Ms. McGarrigle), where teachers genetically modified E.coli bacteria to glow green; a protein electrophoresis lab (presented by Dr. Turner), which included teachers utilizing electrophoresis to separate muscle proteins from various animal species; and an ELISA lab (presented by Mr. Seto), with teachers conducting a simulated diagnostic HIV ELISA.

WCGSMS workshops are extremely popular amongst the local teaching community, with over 500 high school teachers attending the 16 workshops that have been organized since the inception of the WCGSMS Outreach Office in 1999. In the near future, Dr. Turner plans to expand the outreach program to include a series of middle school teacher professional development workshops, with the first workshop planned for mid-April 2004.

###

Medical Students Focus on Research

Weill Cornell medical students learned about research opportunities available in the basic or clinical sciences through a series of special activities held December 2-9.

At "The Student/Faculty Research Mixer" held in the Griffis Faculty Club on December 2nd, first-year medical students interested in research interacted with faculty research mentors. The idea for this inaugural mixer was conceived by the Advanced Basic Sciences Committee, chaired by Dr. Marcus Reidenberg, professor of medicine, pharmacology, and public health.

The "Second Annual Student Research Day" was held in Weill Auditorium on December 3rd, followed by a reception and poster session in Archbold Commons. The program was planned by the Medical Student Executive Council and organizers of "Student Research Day."

On December 4th, the "First Annual Pediatric Interest Group Research Day" took place in Archbold Commons. Students interested in careers in pediatric medicine and first-years looking for a summer research opportunity attended. A poster session of student research was featured and handbooks detailing student abstracts and research opportunities available within the Tri-Institutional community were distributed.

Finally, on December 9th, fourth-year medical student John Pena, a current Howard Hughes Medical Institute (HHMI) fellow, spoke to first-, second-, and third-years about the HHMI-NIH Research Scholars Program at the National Institutes of Health and the HHMI Research Training Fellowships available at non-NIH institutions.

"Research investigation is a vital part of medical education at Weill Cornell. Many of the faculty have made important investigative contributions to the medical sciences and are willing to assist students in their research efforts," said Dr. Carol Storey-Johnson, senior associate dean of education.

###

Weill Cornell in the News

The work and achievements of Weill Cornell faculty and students are frequently featured in the news. Below is a listing of the broadcast, print, and online media—in alpha order by media outlet—which reference their accomplishments. This listing incorporates information from October 20, 2003 through January 9, 2004.

<u>BROADCAST MEDIA</u>	<u>NAME</u>	<u>SUBJECT</u>
ABC Good Morning America	Dr. Nathaniel Hupert	The flu
ABC Good Morning America Bloomberg Radio "Simply Put" CBS Evening News CNN NewsNight MSNBC	Dr. Joseph Fins	The Terri Schiavo "right to die" case
ABC News (Background only)	Dr. Wayne Isom	New heart treatments
ABC World News KNBC-TV Today in L.A. WKRG-TV (CBS, Mobile/Pensacola) WFXR-TV (FOX, Roanoke/Lynchburg)	Dr. Louis Aronne	Louis Aronne was interviewed about the "South Beach Diet"
ABC's 20/20 (Background only)	Dr. Louis Aronne	Prescription weight-loss drugs
BET	Dr. Samuel Mann	Dr. Mann's treatment for hypertension (engendered by press release)
