Student Medical Malpractice Coverage – Decision Tree

NOTES

Coverage for students is on a “limited” or “scope of duty” basis, not 24-hour, full-time coverage. This means coverage is in effect “While acting within the scope or course of … a program of approved medical instruction …”

Program of approved medical instruction means a program approved by the Dean of WCMC, is necessary for the medical education of the student and the student is supervised by a licensed medical professional.

Examples of affiliated programs include Weill Bugundo, GHESKO and similar programs where WCMC has a formal agreement with the outside organization.
